

egniter Profile

TJ HART, PRODUCT

Strategic Partnerships Product Director TJ Hart knows the detriment that untreated cardiac disease has on patients. She learned this in her time as a surgical cardiovascular ICU nurse. She enjoys working with industry and hospital partners to showcase how CardioCare can identify patients with untreated disease and who could benefit from a novel therapy to alleviate the suffering that cardiac patients often experience.

WHY DID YOU JOIN EGNITE, AND WHAT DO YOU DO HERE?

When I learned about egnite and its mission to identify and improve outcomes for every cardiovascular patient in the US I felt compelled to put my name in the hat to be part of it! Applying for an opportunity to add a data mindset to my cardiovascular nurse brain to help impact patients felt like a no-brainer! I work on the product team focusing on clinical trial acceleration alongside our life sciences partners and CardioCare sites.

CAN YOU TELL US MORE ABOUT THE PRODUCT TEAM?

We have such a dynamic group of people on our product team. We apply our various backgrounds in healthcare and IT to develop and refine our product. Every day I am led by example. I am very lucky to have been chosen to be part of such an amazing team of professionals who all have one person in mind. The cardiovascular patient!

WHAT'S YOUR FAVORITE FEATURE OF CARDIOCARE?

My favorite feature of CardioCare is its ability to streamline workflow for end users. Not only does CardioCare identify cardiovascular patients, but it also serves as a means for the end user to digitally track the patient journey from identification through workup, evaluation and to procedure. Gone are the days of post-it notes and clipboards!

WHAT DO YOU LIKE MOST ABOUT WORKING HERE?

Our mission and our people. Our culture is second to none. Our leaders are transformational, transparent, and empathetic. My colleagues are some of the brightest people I have ever had the opportunity to work with. I'm not sure which of those I like most. I love them all!

WHAT DO YOU ENJOY MOST ABOUT BEING THE STRATEGIC PARTNERSHIPS

The thing I enjoy most about my role is not only do I get to constantly learn but I also get to build relationships with CardioCare end users and life sciences partners who are all so passionate about improving patient lives. It is so exciting to see CardioCare be on the forefront of digital health!

WHAT'S BEEN YOUR FAVORITE EXPERIENCE HERE SO FAR?

The people! Everyone here is so kind and willing to help one another.

WHAT'S THE MOST SURPRISING THING ABOUT WORKING HERE?

I had no idea what 'technology' looked like from behind the scenes. It is interesting to learn the details that go into creating and maintaining a digital platform.

WHAT ADVICE WOULD YOU GIVE SOMEONE WHO MIGHT BE CONSIDERING A CAREER IN PRODUCT?

GO FOR IT! A new adventure is a good thing. Give yourself grace. Product roles are complex but very rewarding!

WHAT'S A LESSON YOU'VE LEARNED THAT'S HELPED YOU?

Always assume good intent. Lean in when you need help or can't seem to solve a perceived puzzle because there is a chance a colleague has had the same experience at some point in their journey.
