

egniter Profile

ARIANA ACOSTA, PRODUCT

Ariana Acosta has a deep-seeded passion for both clinical research and cardiovascular health. As Senior Manager of Life Sciences Partnerships she combines both - along with her love of innovative strategies - to help improve patient treatment and pioneer new healthcare solutions.

HOW DID YOU FIRST HEAR ABOUT EGNITE AND WHY DID YOU JOIN?

Back in 2022 I stumbled upon egnite at a HFPEF symposium. Their booth caught my eye with its tech-savvy approach to healthcare. Later I caught one of their talks at the TCT conference and was genuinely inspired by their dedication to reshaping medical care with innovative solutions. The team's enthusiasm and clear vision echoed my own ambition to make a real difference in healthcare. Their smart use of technology to push health advancements really struck a chord with me and I just knew I had to be a part of this forward-thinking crew.

WHAT DO YOU ENJOY MOST ABOUT YOUR ROLE?

What I find most fulfilling is the opportunity to serve as a bridge between cutting edge research and real-world application. I thrive on fostering relationships that not only advance scientific discovery but also translate those advancements into tangible benefits for patients.

WHAT'S BEEN YOUR FAVORITE THING TO WORK ON?

Evaluating and enhancing current workflows to seamlessly integrate CardioCare has been especially gratifying. This process of transforming clinical trial operations - and seeing the direct impact of our work on patient care - continues to be the most rewarding aspect of my role.

WHAT MAKES OUR CULTURE UNIQUE?

egnite's culture is truly unique - a blend of passion, work life balance, and transparency. Working with such dedicated and intelligent individuals focused on improving patient outcomes is inspiring. I'm grateful to be part of a team that cares about our success and well-being, making our work meaningful and our lives balanced. It's a great place to be.

WHAT EXCITES YOU MOST ABOUT THE FUTURE OF EGNITE?

I am most excited about egnite's trajectory towards becoming a leader in integrating technology with healthcare to address complex challenges. The ongoing projects and our roadmap for the future not only promise revolutionary changes in how healthcare is delivered and experienced but also aim to significantly enhance the quality of care for patients.

WHAT DO YOU DO WHEN YOU'RE NOT WORKING?

Jumping into trampoline classes recently I've spiced up my workout sessions. It's a blast! I'm always up for grabbing a bite at some new restaurant with friends. There's also my reading time - my way to unwind. And of course, hanging out with my dog is the best whether we're out for a stroll or just kicking back at home.

AND FINALLY, AS WE APPROACH THE END OF WOMEN'S HISTORY MONTH WHAT ADVICE DO YOU HAVE FOR THE NEXT GENERATION OF WOMEN IN THE PRODUCT AND TECHNOLOGY FIELD?

To the next generation of women eyeing a career in tech: your voice matters. Embrace self-advocacy, never stop learning, and let your creativity shine. The world is richer with your contributions.
