

Optimizing the Delivery of Excellent Care

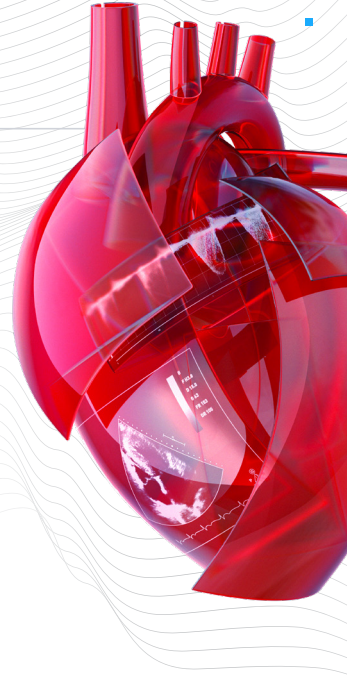

ALTRU'S EXPERIENCE WITH THE CARDIOCARE PLATFORM

CardioCare
Digital Health Platform

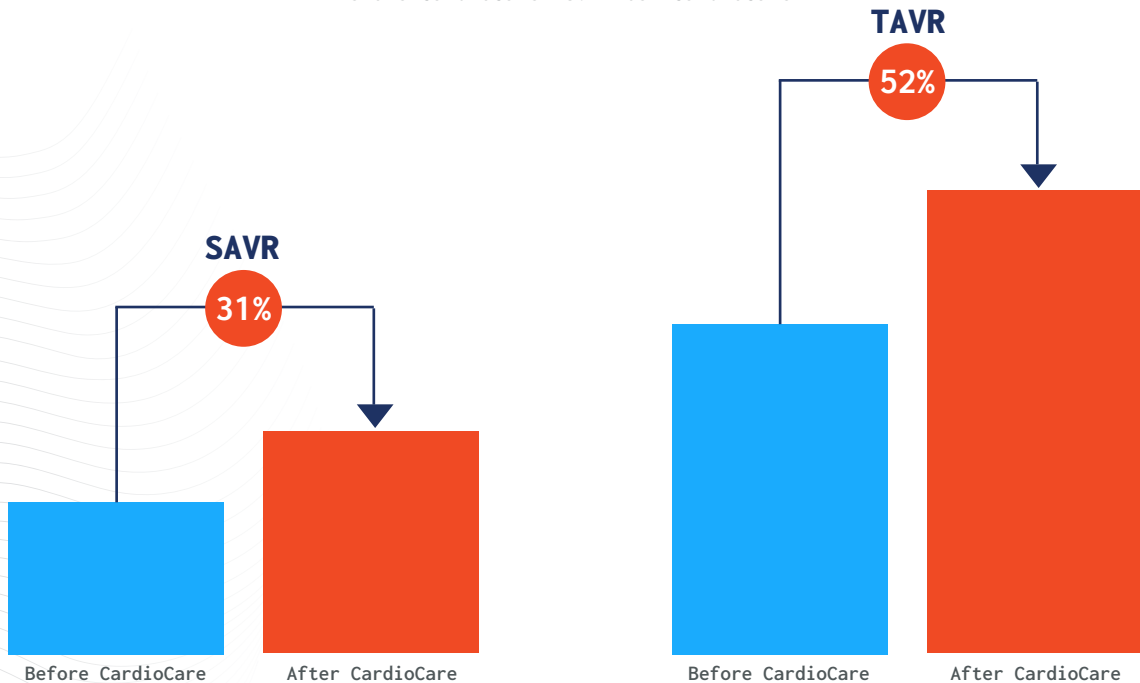

In implementing the CardioCare platform, Altru Health System identified three main goals:

- 1 Grow new transcatheter aortic valve replacement (TAVR) program
- 2 Improve echo report quality for compliant, standard reports every time
- 3 Conduct targeted provider outreach within Altru and outlying programs

REAL-WORLD RESULTS WITH THE CARDIOCARE PLATFORM

Altru Health System's Aortic Valve Replacement Procedures¹
Before CardioCare vs. After CardioCare

HELPING HEALTH SYSTEMS IMPROVE QUALITY

Using the insights within the CardioCare platform, Altru created a protocol for standardizing echo reporting and a process for identifying non-compliant reports for training opportunities. Tracking these quality metrics within CardioCare, Altru recently received their IAC echocardiography accreditation.

“ The CardioCare platform helped us **launch and grow our TAVR program** to treat more patients suffering from aortic stenosis. Now, we’re focusing our efforts on **improving the quality of care** for our heart failure patient population. With CardioCare’s insights, we’re planning to **grow our heart failure clinic to offer more advanced therapies.** ”

Dawn Smith
Practice Manager,
Cardiovascular Program

The CardioCare platform is not intended for use in the diagnosis, cure, mitigation, treatment or prevention of cardiovascular diseases.

This is representative of Altru Health System’s experience using the CardioCare platform.

1. Represents the 6-month time-frame before CardioCare and after CardioCare. 2. Patients identified by CardioCare for a specific disease state or therapy who were previously unknown to that specialty team or are not on a care pathway to treatment for that disease. 3. Represents procedural growth as a result of CardioCare growth using CMS reported contribution margins.
