# Becoming a Destination Program

## MID-SIZED[1] HEALTH SYSTEM'S EXPERIENCE WITH THE CARDIOCARE PLATFORM
## CardioCare
*Digital Health Platform*

In implementing the CardioCare platform,
a mid-sized health system in the Northeast identified four main goals:

**1** Facilitate the identification of patients with moderate valvular heart disease for continued outreach

**2** Grow size and reputation of structural heart program to establish them as a referral destination for high-quality care

## 1,279% RETURN ON INVESTMENT WITHIN 7 MONTHS OF USING CARDIOCARE

CardioCare Impact

| CARDIOCARE-IDENTIFIED INTERVENTIONS[1] | RETURN ON INVESTMENT[2] |
|---|---|
| **43 patients** | **$763,965** |
| 35 VHD patients    2 HF patients    6 AF patients | |

> " The CardioCare platform has helped our program identify gaps and areas of opportunity that have driven process changes, better patient and provider outreach, and improvements within our cardiovascular department. We've **identified** these opportunities so we can **change for the better** to not only improve our program, but **improve patient outcomes within our community.** "
